Useful work

The shift

AI is changing how software is built and used.

Apps, tools, data, and infrastructure are evolving together.

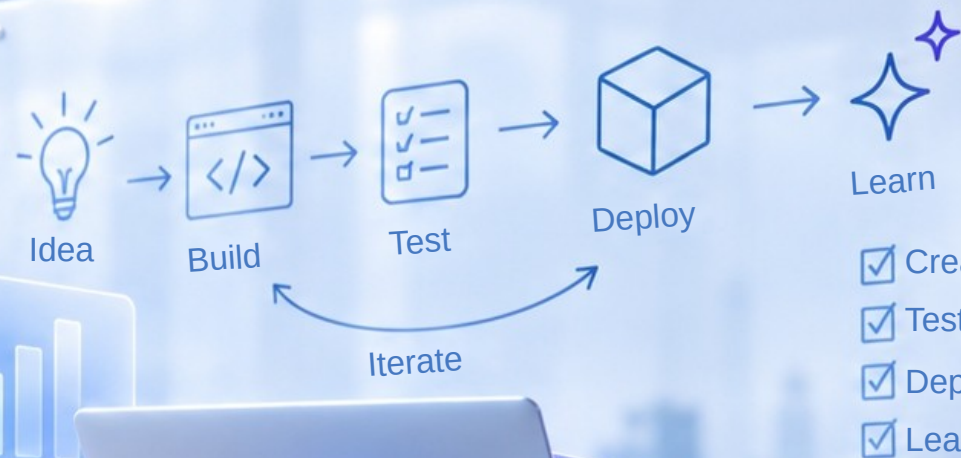

One connected stack.

Tools + platform, built on Azure.

From idea to agent.

One possible path, using tools together.

What makes an agent **useful**?

Capabilities you design and control.

Memory

Context retained if enabled

Permissions

Access you authorize

Allowed actions

Tools you enable

How **builders** work.

Build. Connect. Govern. Evaluate.

The feedback loop.

Observe. Evaluate. Approve. Improve.

PEOPLE + IDEAS + AI + GREATER POSSIBILITIES

Why leaders care.

Measure value, cost, quality, and risk.

From
possibility
to impact
—

**Experience
quality**

Check task success.

**Time +
cost**

Compare total cost.

**Risk +
reliability**

Monitor and review.

From stack to real work.

Connect tools to one useful workflow.

Build what comes next.

Start with one workflow. Measure what changes.
